

Aprilaire Whole-Home Humidifiers Play a Key Role in Wellness

No matter when or where, you ideally want your indoor humidity set between 30-50% all year long.

Maintain Wellness

Viruses, bacteria, mold and other airborne pollutants thrive in excessively dry or damp conditions. Fortunately, people thrive in the sweet spot in between.

Save Energy

Balanced humidity prevents your air conditioner or furnace from working overtime, saving you money on future energy costs.

Protect Your Home

Dry air can lead to cracked wood while damp air contributes to harmful mold growth and pests. Keep your home safe with proper humidity.

Insist on Aprilaire Humidifiers

"I have moved twice now and insist on Aprilaire humidifiers and air cleaners in our house, recommending them all the time. I even bought units for my mother and brother as Christmas presents."

- Customer - P.S.

Trust and Confidence

"We have the uppermost trust and confidence in Aprilaire products. We emphasize the importance of a clean and comfortable home. Aprilaire helps us achieve that each and every time."

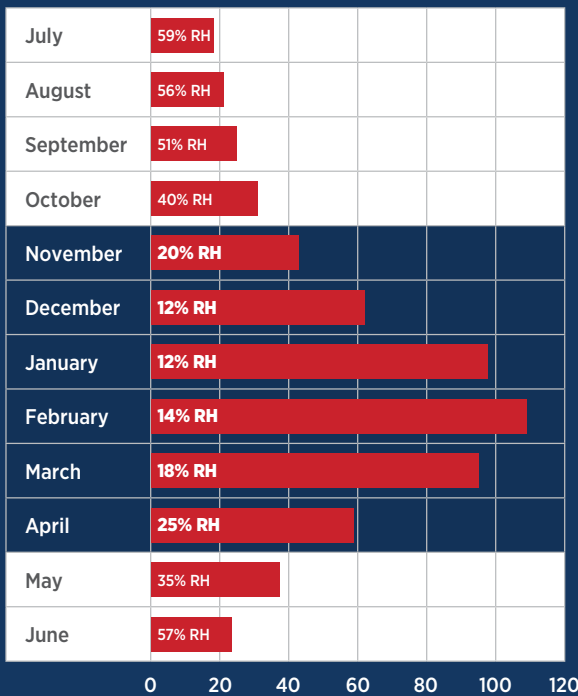

- Partner - Vogl Direct

Breathe Healthy Air
